

JUST DRIVE SIMULATOR SETUP & USER GUIDE

BEFORE YOU BEGIN

Before you begin your experience in the Just Drive Simulator headset, please review the below tips:

Headset Only - No Hand Controllers

The Meta Quest 3 experience is designed to run without the handheld controllers. You only need the headset to begin and complete the simulation.

Stay Seated During Use

For safety and stability, the headset should only be worn while sitting. Do not attempt to stand or walk during the experience.

Choose an Open, Obstruction-Free Space

Set up the headset while seated in an area without desks, tables, or people in front of you. A clear, open space will make setup easier and prevent accidental interference.

Read Instructions Before Putting on the Headset

Take a moment to review these steps before wearing the device. Knowing what to expect will make the process smoother and quicker.

GET STARTED

Secure the headset to your head by adjusting both the overhead and circumference straps. Volume controls are located under your right eye. Power the headset on by holding down the round power button. The power button is located on the left temple of the headset.

IMPORTANT

First-Time Setup: When you use the device for the first time, please be sure to connect to Wi-Fi.

STEP-BY-STEP SETUP TUTORIAL

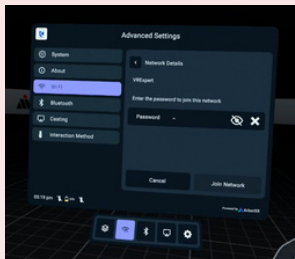

Step 1 – Powering On & Getting Started

After turning on the headset, you will be loaded into this screen to begin setup.

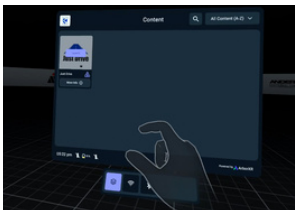

Step 2 – Connect to Wi-Fi

Select the Wi-Fi option at the bottom of the screen to connect the Just Drive Simulator to WiFi.

Step 3 – Select your Network & Enter Your Password

Select your network name and enter in the password information.

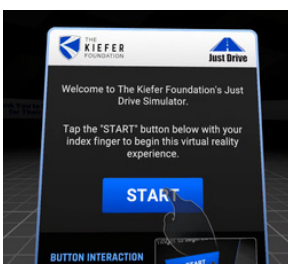

Step 4 – Launch the Just Drive Experience

Using your hand, you will select “Launch” on the Just Drive menu.

Step 5 – Follow the On-Screen Instructions

On-screen instructions will be provided to guide you through use of the internal controls. Press “Continue” when you’re ready to proceed.

Step 6 – You’re Ready!

Your Just Drive Simulator is now ready to use. Press “Start” to enter the simulation and begin your experience.

MANUAL RESET SETUP INSTRUCTIONS

If your headset has been manually reset or an active session unexpectedly ends, you may see the setup screens shown below. **This is uncommon and is not part of the normal user experience.**

This process only needs to be completed if the device has been manually reset or unexpectedly returns to the initial setup screens. **Under normal operation, you should not need to perform these steps.**

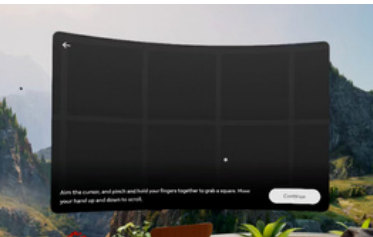

Step 1 – Power On & Enable

After turning on the headset, a screen will appear asking you to enable the device. Use the volume buttons to move the cursor, then select **Enable**.

Step 2 – Continue Setup

On the next screen, use hand tracking (pinch your fingers together) to select **Continue**.

Step 3 – Confirm & Continue

A similar prompt will appear. Once again, pinch your fingers together to select **Continue**.

Step 4 – Final Gesture

On the final setup screen, hold your hand with your palm facing up. Bring your thumb and index finger together to confirm.

HOW TO USE DEVICE CASTING

Device Casting Overview

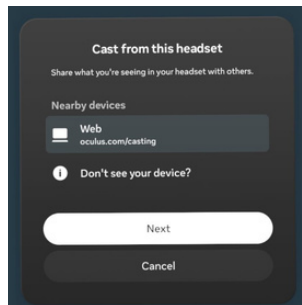

Device casting allows you to display the Just Drive Simulator experience from the Meta Quest 3 headset onto an external monitor, TV, or computer screen. This feature enables observers to view, in real time, exactly what the participant sees inside the headset.

Casting is especially useful during presentations, classroom demonstrations, or public events, as it allows instructors, staff, and audience members to follow along with the experience without needing to wear the headset themselves. This enhances engagement, supports guided instruction, and allows facilitators to monitor participant progress throughout the simulation.

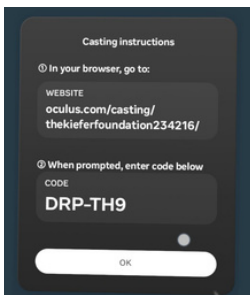

Step 1 – Ensure You’re Connected to WiFi

A Wi-Fi connection is required in order to enable the device casting feature. Once your device is connected (see steps above for connecting to Wi-Fi), you can then enable cast by selecting the “casting” button on the lower menu bar.

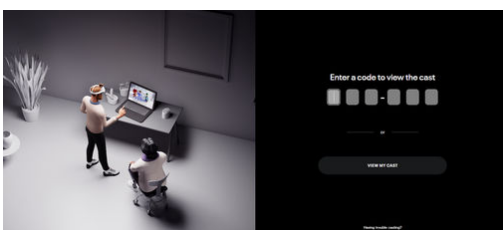

Step 2 – Enable Web Casting

After selecting the Casting button, select “Web” when prompted to enable device casting.

Step 3 – Open on Web Browser or External Device

After selecting “Web,” a screen will appear with a URL. Enter the full URL into a web browser on your computer or external device to enable casting.

Step 4 – Enter Your Cast Code

On your computer or external device, the casting webpage will display a prompt to enter a code. Enter the code shown on the headset to begin casting.

FREQUENTLY ASKED QUESTIONS

GENERAL USE & SETUP

Do I need the controllers to use the Just Drive Simulator?

No. The simulator experience is fully controller-free and uses hand tracking only. Controllers are not required.

Does the headset need Wi-Fi to run the simulator?

The Just Drive Simulator can operate offline once installed; however, a Wi-Fi connection is strongly recommended to ensure full functionality. Wi-Fi allows the headset to receive important software updates, sync participation data with the data dashboard, and enable casting features. Connecting to Wi-Fi helps ensure your device remains up to date and fully supported.

How do I turn the headset on and off?

Hold the power button on the left side of the headset for a few seconds to turn it on or off.

Can the Meta Quest 3 be used while standing?

For safety and accuracy in this experience, the simulator should only be used while seated.

BOUNDARIES & HAND TRACKING

What is a “boundary,” and do I need to set one?

A boundary tells the headset where you are in your space so it can place the virtual content correctly around you. If ever prompted to set one, instructions will be provided on screen. For seated use, a stationary boundary is recommended.

What if I can't see the cursor or hand tracking isn't working?

Make sure your hands are visible to the headset and well-lit. Remove gloves and bracelets, and ensure nothing is covering the cameras.

DEVICE MANAGEMENT

How long does the battery last?

Typical use ranges from 1.5 to 2.5 hours. Plug in using the included charging cable for continuous use.

How do I clean and sanitize the headset?

Use alcohol-free disinfectant wipes on the facial interface and straps. Avoid liquids near the lenses and cameras.

FREQUENTLY ASKED QUESTIONS

TROUBLESHOOTING & SUPPORT

What if I'm not centered in the chair when the experience starts?

If you are not properly centered, open your right palm and pinch and hold your thumb and index finger together on the Meta icon. To reset and recenter the simulator experience, open your left palm and press the following buttons: "Reset Entire Experience" and then press "Return to Dome".

What should I do if the screen freezes or the app won't load?

Restart the headset by holding the power button for 10 seconds. If the issue continues, contact support.

How do I locate my device serial number?

On the headset, you may either scan the QR code to capture the serial number automatically, or locate and read the serial number directly from the headset.

Who do I contact for technical help?

VR Expert provides support:

- Hours: 9:00 AM–5:00 PM EST
- Phone: (862) 445-1139
- Email: support@vr-expert.com

SAFETY & BEST PRACTICES

Is the headset safe for teens and students?

Yes. The simulator is designed for seated, supervised use and complies with Meta safety standards.

Can the headset cause motion sickness?

Most users do well since it's a seated, fixed-view experience. If discomfort occurs, remove the headset and take a break.

How to Reduce or Prevent Dizziness:

To minimize dizziness or motion discomfort, ensure the headset is properly fitted and securely positioned, and adjust the interpupillary distance (IPD) using the wheel so the lenses align with your eyes. If you begin to feel dizzy or nauseous, stop using the headset immediately and resume use only once you feel better. With repeated use, many individuals gradually adapt to the VR environment, and symptoms of motion sensitivity often decrease over time.

PRODUCT WARRANTY

Meta's One-Year Limited Warranty for Commercial Products applies to certain device purchases by commercial customers. For the most current and complete warranty details, please visit [Meta's official website](https://www.meta.com/legal/meta-one-year-limited-warranty-for-commercial-products) by scanning the QR code below.
